

SHRISTI

AI Data Science Analyst | GenAI, RAG, Agentic AI & Data Analytics
Bareilly, UP, India | +91-9675246059 | shristi102005@gmail.com

[linkedin.com/in/shristi-483363295](https://www.linkedin.com/in/shristi-483363295) | github.com/shristi102005-spec | portfolio-shristi.lovable.app

PROFESSIONAL SUMMARY

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript

Data Visualization & Analytics: Power BI, Pandas, NumPy, EDA

Machine Learning: Scikit-learn, Regression, Decision Trees, Random Forest, Cross-Validation, Feature Engineering, Model Evaluation

Vector Databases: FAISS, ChromaDB, Qdrant, Embeddings, Semantic Search

Cloud & Tools: Google Cloud Platform, Vertex AI, AWS, Streamlit, Git, GitHub, Jupyter Notebook, PostgreSQL, Supabase, Redis

Electronics: VLSI, Verilog, FPGA, Embedded Systems

PROFESSIONAL EXPERIENCE

AI & ML Intern, Prompt Pulse

Jun 2026 – Present

- Supporting development of K-GPT, a RAG-based AI study assistant for college students, alongside the founding team.
- Set up and maintained full-stack local development environment (Next.js, FastAPI, PostgreSQL via Supabase, Redis, Cloudflare) on Windows.
- Conducted systematic QA testing across chat accuracy, multilingual support, memory retention, LaTeX rendering, and OCR; identified and reported a critical PDF/DOCX upload regression.
- Researched and recommended OCR model strategy (Gemini 2.5 Flash) for the document-processing pipeline.
- Contributed to prompt engineering, dashboard testing, and debugging across the LLM-based application pipeline.

Campus Ambassador Intern, eDCiit Delhi Beacon 2026

Dec 2025 – Feb 2026

- Led campus outreach at MJPRU for a national tech festival attended by 500+ participants.
- Managed logistics, event promotion, communications, and coordination activities.

PROJECTS

AI Career Copilot (In Progress) — Full-Stack AI Application for Resume Analysis & Job Matching

Python | FastAPI | Next.js | pdfplumber | REST APIs | LLM APIs | Git

- Building a full-stack AI application for ATS resume analysis, job matching, and AI-powered cover letter generation using FastAPI, Next.js, and LLM technologies.
- Built a FastAPI backend with a modular architecture and a REST API for resume upload and PDF text extraction.
- Integrating LLMs to analyze resumes, identify skill gaps, and generate personalized recommendations.

github.com/shristi102005-spec/AI-Career-Copilot

NeuroNest AI — AI-Powered Document Intelligence System

Python | LangChain | FAISS | ChromaDB | Hugging Face | OpenAI API | Streamlit

- Built a RAG system for semantic document search and context-aware Q&A using FAISS and ChromaDB vector stores with transformer embeddings.
- Implemented automated MCQ generation and document summarization; deployed as an interactive Streamlit web app.

github.com/shristi102005-spec/NeuroNestAI

Synckro — Real-Time Multilingual Translator

Python | Vosk | Deep Translator | Argos Translate | Pytsx3 | JavaScript

- Built a Speech-to-Text → Language Detection → Translation → Text-to-Speech pipeline with online/offline fallback.
- Developed a JavaScript session dashboard with conversation logging, timestamps, and detected-language tracking.

Customer Shopping Behavior Analysis

Python | PostgreSQL | Power BI | EDA

- Analyzed 3,900+ retail transactions through a Python → PostgreSQL → Power BI pipeline.
- Surfaced 5 actionable insights on customer segmentation, discount behavior, and revenue patterns.

EDUCATION

B.Tech, Electronics Engineering (AI & ML Specialization) — MJPRU, Bareilly

Expected Jan 2027

Diploma in Proficiency in German Language — MJPRU, Bareilly

Jan 2025

CERTIFICATIONS

- Introduction to Generative AI — Google Cloud
- Generative AI Studio (Vertex AI) — Google Cloud
- Introduction to Machine Learning — Kaggle
- Cloud Load Balancing — Google Cloud
- AWS Artificial Intelligence Practitioner Learning Plan — Completed
